

Natural Henna Cones

Chemical Henna Cones

Packaging	Clear/Colored/patterned hand rolled cellophane or mylar	metallic cones, often printed with images/text
Storage	Freezer	On the counter
Smell	Like a spa! Eucalyptus, Lavendar, Tea Tree etc.	Pungent, chemical scent, often states, "Mehendi Oil" - no such thing
Paste Color	Brownish green	Blackish brown
Texture	Thick and creamy	Watered down, goopy
Paste Time	Keep it on for 4 hours or more	Keep it on for about an hour
Stain Color	Bright orange at first, burgandy/brown/red in 36hrs	Reddish brown right away or black!
Stain duration	7-10 days or longer depending on location	3-5 days (if it has PPD, it can last much longer because it's a chemical burn)
